

United States Senate

WASHINGTON, DC 20510-0908

June 4, 2024

There is no threat to access to contraception, which is legal in every state and required by law to be offered at no cost by health insurers, and it's disgusting that Democrats are fearmongering on this important issue to score cheap political points. This bill infringes on the parental rights and religious liberties of some Americans and lets the federal government force religious institutions and schools, even public elementary schools, to offer contraception like condoms to little kids. It's just another way for Democrats to use activist attorneys and our courts to advance their radical agenda and that is why we oppose this bill.

Sincerely,

Tom Pelt
